

Guide to Transferring in .uk.com, uk.net (Centralnic) Domains

You may transfer the following Centralnic domains to Daily.co.uk:
.uk.com, .uk.net, .gb.com, .gb.net, .de.com, .web.com, .us.com, .eu.com

The transfer request is sent to the current Billing contact who is normally the current provider.. This request must be either approved or rejected within five calendar days.

If it is approved the domain is transferred to the gaining provider, daily.co.uk and put into your control panel.

If it is neither approved nor rejected, in other words if the losing provider fails to respond either one way or the other, then the transfer is rejected. In these circumstances you may make a request (ideally on company letterhead) directly to Centralnic, to transfer the domain.

Follow the instructions given in FAQ 3 by going to the link below
