

Guide to Transferring in .uk Domains

1. Contact your current provider and ask them to change the **IPSTAG or Registrar TAG** to **DAILY**.

2. Log in to your daily.co.uk control panel. On the left hand menu select "Domains", then "Transfers", then "Transfer your domains to Daily.co.uk"

Alternately you can follow this link:

<https://www.daily.co.uk/products/domain-names/domain-name-transfer.html>

3. Enter the domain name you wish to transfer.

4. If you are transferring a .uk domain name decide whether you want to change the nameservers during the transfer or keep them as they are. (see below)

Please note

If you currently have a website hosted with another provider, and merely wish to hold your domain with daily.co.uk for ease of management and renewal, then keep the nameservers at their current settings and there will be no disruption to your services during the transfer process.

If you wish to use daily.co.uk to set up email forwarding, web forwarding, or purchase hosting and other services from us then choose to change your nameservers during transfer.
